Explanation

- >5000 Rioja wines and scores collected with an AI scraper.
- >1000 prices collected with an AI scraper (Octoparse).
- >2000 red Rioja wines with a score higher than 90 analysed with AI (Manus & ChatGPT).
- Used a tailormade formula (Claude) to calculate score/price ratio with an exponential difference between scores (**value score**).
- Result: 75 red Rioja wines organised in pricing categories and ranked by value score.
- Limitations: not all wines have multiple ratings, price is an indication and can fluctuate.
- AI tools are not 100% accurate: if you think a wine is missing or doubt the information, please let me know so I can adjust!
